Data collected Spring 2022

Introduction

Congratulations! Based on your administration of the Illinois Youth Survey (2022), this report provides data on a variety of health and social indicators including drug use, bullying, school climate, and much more. Your data has been organized into topical sections as noted in the table of contents on the next page. To help you get started using your data, here are a few suggestions:

Review the table below to determine how widely your students participated in the survey. If the “% of Enrolled Students Reported” **is at least 50% for each grade level**, you can be more confident that the data in your report is representative of your total student population.

There will be NO DATA presented in this report for any grade level with **fewer than 10 valid surveys** (in the column “N Students Surveyed”). This is to protect the confidentiality of your students.

Comparison of Students Surveyed with Enrollment

	N Students Surveyed	N Enrolled Students	% of Enrolled Students Reported
8th	148	167	89%
Total	148	167	89%

Keep in mind that the IYS 8th grade form does not include all questions asked on the IYS high school form. For that reason, responses to some questions do not appear in the tables and charts for some grade levels. If you would like to determine what section includes responses to a specific survey item or verify if a question was asked at a specific grade level, please refer to the Site Report Appendix on the IYS website at <http://iys.cprd.illinois.edu/results>.

When looking at percentages, keep in mind that 0% is a rounded number and may not mean "0" people affected.

Tables can be helpful when you are looking for a summary of responses for particular survey questions, for example, the percentage of 8th grade youth who report using prescription painkillers to get high. Some tables may contain a mean score (an average of all the responses), a median score (the middle point of all responses given) or an “N” (number of students who responded to that question). Tables can also be useful when you need specific data to support a grant or report. If you see an “**N/A**” (**Not Applicable**) noted in a table, this indicates that the question was **not asked at that grade level**. If you see an “**N/R**” (**Not Reported**) noted in a table, this indicates, unless otherwise specified, that *at least 90% of students skipped the question for no known reason*, making the results too biased to report. For tables that are “among users” only grade levels with “at least one user” will display; grade levels with “0” users will not show.

Summary charts were provided in previous years to help you compare your results to a random sample of students across the state of Illinois. Due to the COVID-19 pandemic and subsequent school closures, an IYS state sample is not available for 2020 and there are no summary charts included in this report. State level results from the 2022 IYS will be available in late fall, so you will be able to compare these results to the state estimate at that time. Until then, you can compare your results to your district or county (if available), to a county with similar characteristics, or to the 2020 report for suburban Chicago counties, other urban/suburban counties, or rural counties (Chicago is not available). All of these reports are available on the IYS website, with the exception of district reports, which are available only through district superintendents. Summary charts will return in the next IYS administration year.

We are confident that you will find this report to be a valuable resource for planning, grant writing, program development and reporting. If you have any questions about your report, please call 888-333-5612 and ask for an IYS Coordinator or visit the IYS website at <http://iys.cprd.illinois.edu/>.
